HospiPAL

Stitching Hospitals Together to Create a Better World

HospiPAL

$765,000,000,000

That's a lot of money. It's how much the US healthcare system wastes per year.

5,000,000

That's how many people die every year because of lack of access to medical equipment in low income countries.

0

That's how many platforms connect hospitals to allow them to donate their extra equipment to hospitals in need. **Until now.**

HospiPAL

THIS IS WHERE HospiPAL COMES IN

- Hospitals with excess can post their machinery instead of costly disposal
- Hospitals in need can request equipment

our algorithm stitches them together

OUR TEAM

#TeamZachathon

We have been awake for many hours in a row. We are as is commonly known as tired aka exhausted

We did still eat the pizza THIS morning. It was congealed- our stomachs hurt.

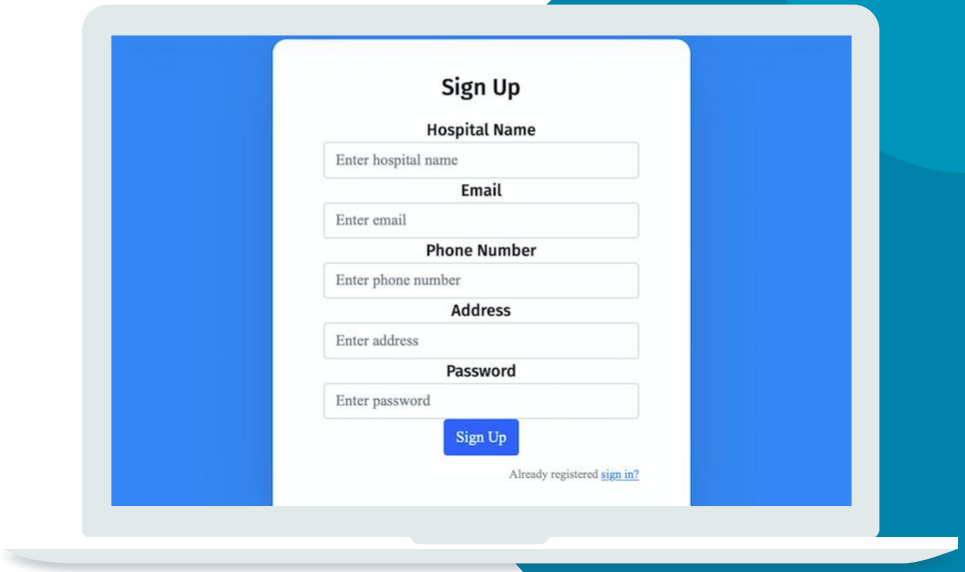
HospiPAL

Using Javascript and Node, we built a website that keeps a database of all posts and requests and displays them to client hospitals.

When we find a match, our code notifies the paired hospitals.



HospiPAL Will Have a Global Impact
